

ASA612

Sliding Gate Motor

The ASA612 is made in Italy and designed for residential gates of up to 600kg in weight.

The engineering is focused on simplicity, reliability and low cost. Married to the ID410 logic control board the ASA612 is a 12 volt motor. This is the very same reliable motor that Automatic Gate Solutions has been using now for fourteen years. A proven performer in an upgraded base and cover.

INSIDE THE BOX

The ASA612 comes complete with ID410 logic control with built in wireless receiver and limit actuators that mount directly to your rack. Solar ready unit only requires solar panel and battery.
