"Handleless stainless steel insert lock"

LOCINOX®

Let's make better fences together

100% stainless steel insert lock with hook for a mechanical closure of (automated) sliding gates. The absence of handle followers and handles prevents people from climbing over the fence with the handle as a step.

The anti-theft pin which prevents lifting of the gate can be removed, this makes it possible to use the H-COMPACT lock in swing gates.

Handleless stainless steel insert lock with hook

- Suitable for swing- and sliding gates
- Mechanism, hook, front plate, chassis and all internal mechanical parts are a 100% stainless steel
- Stainless steel hook for night locking
- Throw of the hook: 33 mm
- Hook in combination with the keep provides a secure anchoring
- (Removable) pin prevents lifting the hook from the keep when used in a sliding gate
- 40 mm backset
- Lock mechanism with cover plate against dirt penetration
- Available with 46, 54, 60 and 80 mm cylinder

Accessoires:

Stainless steel keep for the H-COMPACT insert lock. The 33 mm throw of the hook and the anti-lift protection provide a secure anchoring.

H-Compact / SHKC keep
